## **HOFA** Curtain Rod Set

Ceiling Mount with Ceiling Brackets

ayout 22.11.2023 KK Seite 1/8

## **Accessory Parts:**

Rod	Length and number of pieces depending on the total length of the system
Base Plate	Number depends on the length of the rod
Cover Plate	One cover plate per base plate
Ceiling Bracket	One ceiling bracket per base plate
End Cap	Usually, one end cap is required at each outer end of the rail.

### **Mounting Parts not Included**

For safety reasons, we do not include dowels and screws for fitting heavy curtains.

The correct selection of suitable fastening components depends on the surface. If in doubt, please check the load-bearing capacity of the surface and the choice of dowels and screws with a specialist.

Layout 22.11.2023 KK Seite 2/8

### **General Information:**

We recommend that two people carry out the installation. Secure fastening and the correct choice of screws and wall plugs always depend on the condition of the wall or ceiling and can only be correctly assessed on site. If in doubt, please consult a tradesperson.

For trouble-free installation, the surface should be as even as possible. Woodchip wallpaper is normally not a problem. On very uneven surfaces, such as natural stone, for example, installation is very difficult or even impossible. On slightly uneven surfaces, e.g. in old houses, the installation of non-split rails is usually also possible.

If you have any questions during the installation of the system, please do not hesitate to contact us by phone or e-mail: <a href="https://hofa-akustik.de/en/kontakt/">https://hofa-akustik.de/en/kontakt/</a>

### **Tools and Equipment Required:**

- Drilling machine with drill bit
- Cordless screwdriver with bit
- Allen key mm
- Spirit level
- Pen
- Depending on the surface (additionally): mounting adhesive for gluing in the dowels

#### **Overview:**

ayout 22.11.2023 KK Seite 3/8

### **Positioning of the Holders**

If the system is installed in front of a wall, the rod should be mounted at a distance of approx. 9.5 cm from the wall.

### Example for 370 cm rod length (split rod)

# ► HOFA-Akustik

### Step 8

Position the curtain rod with the covers under the base plates and slide it into the holders in the base plates.

### Step 9

Hold the position and tighten both grub screws on the holder.

### Step 10

Slide the end caps onto the ends of the rods...

...and tighten with the grub screws.
