# Curtain Rail Set Standard

## HOFA Curtain Rail Set Heavy

The HOFA Curtain Rod Set Heavy is an elegant and reliable solution for suspending lightweight acoustic curtains. The high quality stainless steel construction combines stability with a refined design and blends seamlessly into any living or studio environment. The system offers flexible mounting options including wall mounting, ceiling mounting and niche installation using wall brackets

### Dimensions and Weight:

Custom lengths are available upon request.

The weight is approximately 1.3 kg/m.

|                        |          |                                                                                     |
|------------------------|----------|-------------------------------------------------------------------------------------|
| Rod lenght (standard): | 195,0 cm |  |
| Diameter (outside):    | 18,0 mm  |                                                                                     |
| Diameter (innside):    | 16 mm    |                                                                                     |
| Material thickness:    | 1 mm     |                                                                                     |

### Mounting Material:

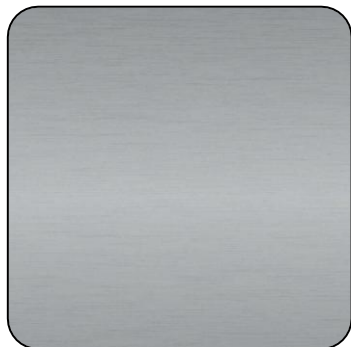

|            |                                                                                       |
|------------|---------------------------------------------------------------------------------------|
| Rod        |   |
| Base Plate |  |
| Holder     |   |
| End Cap    |  |
| Screw      |   |
| Dowel      |   |
